CAM Real Estate Development LLC 30 Years of General Contracting

John Acker, owner and operator of CAM Real Estate Development, LLC, has been providing Rochester and its surrounding communities with outstanding general contracting services for more than 30 years.

Pictured above: John Acker, Owner and Operator of CAM Real Estate Development, LLC

From residential remodeling and renovations, to kitchens, baths, windows, porches, decks, basements, additions, and siding, John is highly experienced in all aspects of general contracting and very well respected within the industry and the community as well.

Wow! What a wonderful job! Your whole crew deserves great applause.

The siding men were very thorough and did such a professional job. The way they wrapped around the windows was fantastic. And they even put on my house numbers and new mailbox. The furnace men were quick and efficient and they even put up with my six-year old grandson asking questions. The cellar block window man worked right through the rain and cleaned up nicely. We especially want to mention the inside men John and Tim. They put in our windows, back and storm door, counter top, back splash, and kitchen floor. They were so helpful and even when I bought the wrong items they took them back and got the right ones and they were kind to me about it. They were very open to questions and suggestions. They were so neat and cleaned every area when they finished a job. As if all that was not enough, we need to thank you for always being there and for the guarantee you give for a year.

We would recommend your company to anyone.
